

## Illness Policy: How Sick is Too Sick?

When to Keep Children at Home

**IN CARE OF KIDS** 

## There are three reasons to keep sick children at home:

- 1. The child does not feel well enough to participate comfortably in usual activities, (such as; extreme signs of tiredness, unexplained irritability or persistent crying).
- 2. The child requires more care than program staff is able to provide, without effecting the health and safety of the other children.
- 3. The illness is on the list of symptoms or illness for which temporary exclusion is recommended.

## Children with the following symptoms or illness should be kept (excluded) from school:

SYMPTOM	Child Must Be at Home?
Diarrhea frequent, loose or watery stools compared to child's normal pattern; not caused by diet or medication	Yes – if child looks or acts ill; if child has diarrhea with fever; if child has diarrhea with vomiting; if child has diarrhea that is not contained in the diaper or the toilet
Fever with behavior changes or illness  Note: An unexplained temperature of 100.4°F or above is significant in infants 4 months of age or younger and requires immediate medical attention	Yes - when fever is accompanied by behavior changes or other symptoms of illness, such as rash, sore throat, vomiting, etc.
Flu Symptoms Fever over 100°F with a cough or sore throat. Other flu symptoms can include fatigue, body aches, vomiting and diarrhea	Yes - for at least 24 hours after there is no longer a fever, without the use of fever-reducing medicine
Coughing severe, uncontrolled coughing or wheezing, rapid or difficulty breathing  Note: Children with asthma may be cared for in school with a written health care plan and authorization for medication/treatment	Yes - medical attention is necessary
Mild Respiratory or Cold Symptoms stuffy nose with clear drainage, sneezing, mild cough	No – may attend if able to participate in school activities

RASH <u>With</u> Fever  Note: Body rash <i>without</i> fever or behavior changes usually does not require exclusion from school; seek medical advice	Yes - seek medical advice. Any rash that spreads quickly, has open, weeping wounds and/or is not healing should be evaluated
Vomiting two or more episodes of vomiting in the past 24 hours	Yes – until vomiting resolves or a health care provider decides it is not contagious.  Observe for other signs of illness and for dehydration

ILLNESS	Child Must Be At Home ?
Chicken Pox	Yes - until blisters have dried and crusted (usually 6 days) If blister occurs after chickenpox vaccination, refer to Health Dept Guidelines
Conjunctivitis (Pink Eye) Or	Yes - until 24 hours after treatment
pink color of eye <i>and</i> thick yellow/green discharge	If your health provider decides not to treat your child, a note is needed
Croup (See Coughing)	Seek medical advice
Note: May not need to be excluded unless child is not well enough to participate in usual activities	
Fifth's Disease	<b>No</b> - child is no longer contagious once rash appears
Hand Foot And Mouth Disease (Coxsackie virus)	<b>No</b> - may attend if able to participate in usual activities, unless is drooling
Headlice Or Scabies	No – not very contagious
Hepatitis A	Yes – until 1 week after onset of illness or jaundice and when able to participate in usual activities
Herpes	<b>Yes</b> – if area is oozing and cannot be covered, such as mouth sores
Impetigo	<b>Yes</b> – for 24 hours after treatment starts
Ringworm	No – not very contagious
Roseola	Yes – seek medical advice
Note: A child with rash and no fever may return to school	
RSV (Respiratory Syncytial Virus)  Note: A child does not always need to be excluded unless he/she is not well enough to participate in usual	Seek medical advice. Once a child in the group has been infected, spread of illness is rapid

Strep Throat	Yes - for 24 hours after treatment and the child
	is able to participate in usual activities
Vaccine Preventable Diseases	<b>Yes</b> – until determined not infectious by the
Measles, Mumps, Rubella (German Measles),	health care provider
Pertussis (Whooping Cough)	
Yeast Infections	<b>No</b> – may attend if able to participate in school
including thrush or candida diaper rash	activities
	Follow good hand washing and hygiene
	practices
